What is ALLOVER?

ALLOVER has been created to redesign spaces using a continuous, seamless material. An even surface offering endless expressive possibilities.

Three dimensional creativity

ALLOVER is a single-component system exclusively for interior surfaces that creates highly durable coatings on floors, ceilings and walls. Allover creates cosy, harmonious environments by making modern, customised finishes in line with current interior-design trends.

It enhances the existing design features, and optimises the areas by creating a pleasing aesthetic continuity in keeping with the norms of modern architecture.

PERFECT FOR

residential

commercial

wellness premises

What ALLOVER does

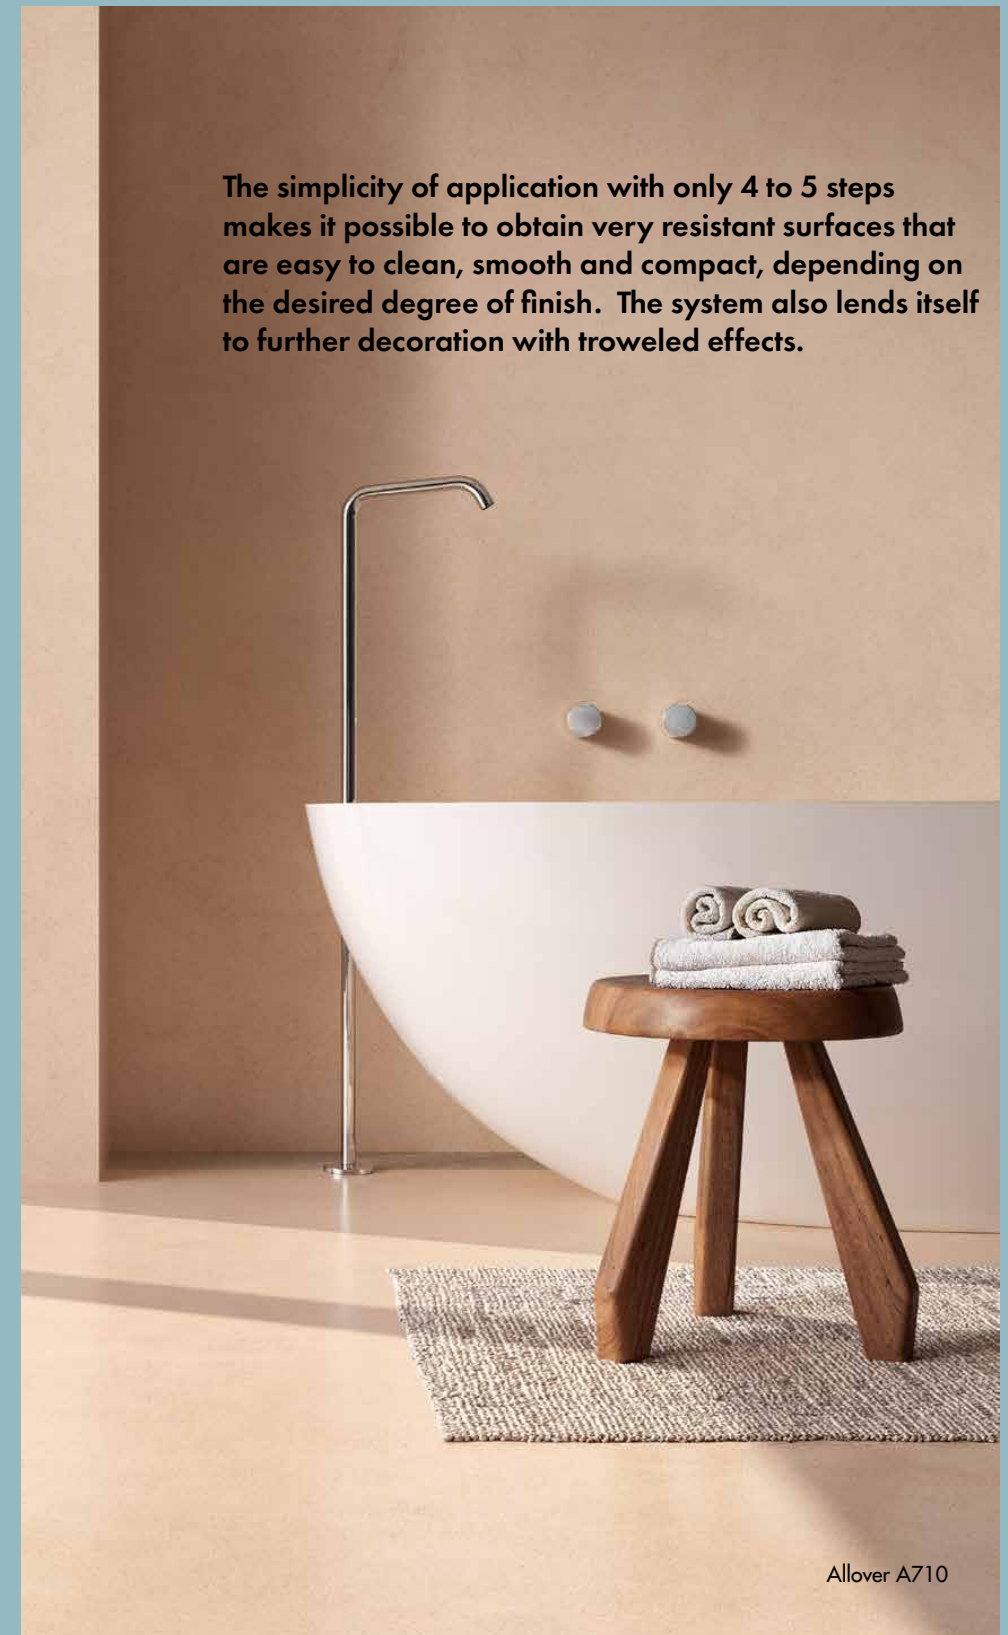

A single material to define your spaces

ALLOVER is a continuous covering that can be adapted to best satisfy design requirements. Texture, light and depth come together in a surface that evokes both visual and tactile sensations.

The ALLOVER system can also be applied on walls and floors in bathrooms, shower cubicles and changing rooms in residential and sports facilities, with the exception of application on shower trays and ceramic or resin sanitary fixtures.

The simplicity of application with only 4 to 5 steps makes it possible to obtain very resistant surfaces that are easy to clean, smooth and compact, depending on the desired degree of finish. The system also lends itself to further decoration with troweled effects.

Creative seamless finishes:
material that flows without boundaries

Allover A751-A737

Where to apply
ALLOVER

From living spaces to bathrooms, from vertical surfaces to furniture and fittings: ALLOVER fits in with every type of interior, bringing elegance and functionality and at the same time maintaining a continuous texture and the highest technical performance in all situations.

Impeccable grip on multiple surfaces

The system can be applied directly to the most common surfaces (tiles, screeds, gypsum plasterboard and cement plaster) without costly and time-consuming preparation of substrates. It can be applied in areas such as living rooms, kitchens, bathrooms, laundry rooms, and even on furniture. It is perfect for protecting portions of the wall behind the stove and sink from water splashes and stains.

IDEAL SURFACES AND CONTEXTS*

Living areas	Wellness environments
Kitchens	Retail areas
Bathrooms	Indoor flooring
Vertical walls subject to splashing	Ceilings
Furniture and fittings	

* Refer to the technical installation manual

Easy application and high performance

Allover A718-A730-A745

ALLOVER performance

ALLOVER combines high performance with installation that requires no invasive work. A single-component, water-based system that is easy to apply, reduces application time and ensures reliable, long-lasting results.

KEY FEATURES

Ready to use
Easy trowel application
Only 2 mm thick
3 Single-component products
Possibility to customise effects and colours

A FEW SAFE STEPS WITH 3 WATER-BASED PRODUCTS:

892 Allover Base Decorative basecoat/finish coat	892 Allover Finish Decorative finish coating	896 Allover Top Water-repellent protective top coat semi-matt or matt versions
--	--	--

BENEFITS

High Adhesion, excellent resistance: against impacts, to water, to stains, (coffee, wine, tea), to scratches, no demolition costs.

 Indoor air comfort certified	 Indoor Air Quality A+	 HACCP	 Ready to use
 Colourable on the tinting system	 Scratch resistance	 Stain resistance	 Water resistance
 Impact resistance	 Resistant to underfloor heating	 Resistant to detergents	 Resistant to abrasion caused by office chair castors

The visual effects
of ALLOVER

Through colour, surfaces spring to life. ALLOVER presents a new palette of shades selected to interact with interior design trends, providing designers with a rich and refined creative tool.

Colour as the language of design

Over 50 carefully selected shades, all produceable on the San Marco tinting system, to accompany every project with consistency and artistic flair. Colour is not a detail: it's an integral part of architectural language. With ALLOVER, it becomes a tool for shaping space, defining atmospheres and creating identity.

3 AESTHETIC EFFECTS

	"SMART" APPLICATION SYSTEM
	2 Coats of Allover Base
+	2 Coats of Allover Top
	CICLO FLAT
	2 Coats of Allover Base
+	1 Coat of Allover Finish
+	2 Coats of Allover Top
	CICLO FLAT WALL
	2-3 Coats of Allover Finish
+	2 Coats of Allover Top

PERFORMANCE OF THE ALLOVER SYSTEM

- Tested according to EN 2013:12720 for surface resistance to cold liquids
- Tested according to EN 12721:2013 for surface resistance to moist heat
- Suitable for environments with the presence of food as per UNI 11021:2002
- Suitable for underfloor heating
- Tested according to EN 425:2006 for abrasion resistance of office chair casters
- Reaction-to-fire classification: EN 13501-1:2019: B fl s1

TECHNICAL MANUAL

*The colours shown here are for illustrative purposes only. For a more accurate selection, please refer to the colour chart.

892 Allover Base

Decorative Basecoat/finish coating for seamless floor- and wall-coverings. Allover Base is a trowelable paste product created specifically as a high adhesion base coat and at the same time a finish coat with a textured appearance, for application on both horizontal and vertical indoor surfaces. The product guarantees excellent adhesion to substrates such as concrete, old resin floors, and tiles. For smoother, less-porous finishes. Finish with 1 coat of Allover Finish.

TECHNICAL DATA

TOOLS	STAINLESS STEEL SPATULA
YIELD	REFER TO THE TECHNICAL MANUAL
LAYERS	1-3
DILUTION	READY TO USE

894 Allover Finish

Decorative finish coating for floors and walls. Allover Finish can only be used over horizontal and vertical coatings prepared with Allover Base, when a smoother, more minimalist and less textured aesthetic finish is desired.

TECHNICAL DATA

TOOLS	STAINLESS STEEL SPATULA
YIELD	REFER TO THE TECHNICAL MANUAL
LAYERS	1-3
DILUTION	READY TO USE

896 Allover Top

Water-repellent protective, transparent top coat. Allover Top is the transparent water-dilutable protective coating for Allover System, with a matte or semi-matte final effect. The product provides high resistance against water, hot and cold liquids, and many substances normally used in the residential and catering sectors.

TECHNICAL DATA

TOOLS	ROLLER, BRUSH, SPRAY
YIELD	7-8 M ² /L IN 2 COATS
LAYERS	2
DILUTION	0-15% WITH WATER
